

custom services

DESIGNLINE

Our free DesignLine Service will translate your concept schemes or sketches into accurate layout plans using AutoCad®. Simply send or fax details of the application and we will provide drawings, components lists and costings by return. Our dedicated on-line staff will provide prompt technical support and assistance.

CUSTOM FABRICATIONS

In addition to the standard range of products featured, we can produce virtually any type of special components to suit your specific requirements. Single tube fabrications, curved sections or plate constructions are just a few of our specialities. These may be used to complement existing components or as individual elements.

Our 24 hour production facility ensures a rapid delivery on even special configurations. Send or fax details of your requirements to our DesignLine team, our staff will be pleased to provide detailed information including delivery and price estimates.

Highly skilled welders can turn any high flown design into reality - such as our own stand at Plasa 99.
